Homework 12:
Final Project, Phase 5:
Final Code Submission
Out Tuesday, 5/6/14
Due no later than Saturday, 5/17/14
10 points

Programming Logic and Design
ITEC 1150
Spring Semester, 2014
Eric V. Level, Instructor

In this Phase 5 of your Final Project, you'll upload your final version of your code along with brief instructions on how to run it.

Write a *brief* document which describes how to run you submitted Python code. Be sure you describe what the user is supposed to do in order to interact with the program, if relevant.

Submit (a) your final Python code as one or more `.py` files, and (b) your "how-to-run" document, both to the **Homework 12 (Dropbox) Phase 5.**
